

Reference No. :- **IDEATN018375****1. Details of Incubatee:**

1.1 Details of the Host Institute (HI)	RMK College of Engineering & Technology , RSM Nagar, Puduvoyal, Gummidipoondi Taluk, Tiruvallur Dist.,Chennai 601206 , 04467900679 , principal@rmkcet.ac.in , 9443867923	1.2 Name of the Business Incubator (BI)	Dr P. K. DEVAN , Professor , devanpk@rmkcet.ac.in , 9444801774
1.3 Category of the Incubatee	Student	1.4 Incubatee Name	D.L.Priyanka
1.5 State	TAMIL NADU	1.6 District	CHENNAI
1.7 Email ID	priyca106@rmkcet.ac.in	1.8 Mobile Number	9514628959
1.9 Category	OBC	1.10 Gender	Female
1.11 Address	No122,KVT Smart City,Sembulivaram,Chennai-67		

2. Details of Idea:

2.1 Title of proposed idea/innovation	Hospital Bed Booking and Emergency Management System
2.2 Whether the idea involves use of existing intellectual property or not, give brief detail there of	No
2.3 Briefly explain newness/uniqueness of the innovation	The Hospital Bed Booking and Emergency Management System is the integration of realtime technology and healthcare services: Instant GPS Based Bed Availability Aadhar Based Patient Verification Aiding in Intelligent Emergency Response Empowers the system to automatically flag emergency cases Scalable and Adaptive Design Hospital Bed Availability Instant Patient Verification via Aadhar API
2.4 Concept & Objective	The Hospital Bed Booking and Emergency Management System is designed to streamline patient access to hospital resources through real-time technology. By combining GPS-based bed tracking, Aadhar verification, and prioritized emergency handling, the platform provides a seamless, efficient admission process for both emergencies and routine care. Objective: The project aims to create a healthcare solution that improves patient care delivery and optimizes hospital resource management. The system bridges the gap between patients and hospitals by offering real-time insights and centralized management, ensuring faster response times, enhanced patient outcomes, and smoother hospital operations.

2.5 Specify the potential areas of application in industry/market in brief	1. Healthcare Industry Application: Improve patient admissions and emergency response systems. Benefits: Faster response times and better resource allocation. 2. Hospitality Sector Application: Bed booking systems for healthcare facilities. Benefits: Greater efficiency and shorter patient wait times. 3. Transportation and Logistics Application: Location tracking for emergency services. Benefits: Enhanced routing for ambulances and quicker transport times. 4. Technology Development Application: Mobile and web applications for healthcare services. Benefits: Greater accessibility and real-time updates for users. 5. Insurance Services Application: Platforms for managing hospital-related insurance claims. Benefits: Streamlined claims processing and improved transparency. 6. Government and Public Health Application: Initiatives for public health response and emergency preparedness. Benefits: More effective resource distribution and better community health outcomes.		
2.6 Briefly provide the market data for the potential idea/ innovation	High demand for efficient healthcare and patient management solutions. Fills a critical gap: quick emergency access and bed management. User-friendly platform essential for hospitals embracing digital tools. Real-time tracking and booking enhance patient experience, optimize resources. Aligned with healthcare tech market's projected 15 growth (CAGR). Comprehensive solution for emergency and routine care needs.		
2.7 Name and details of Mentors	Dr.N.R.Rejin Paul ME,PhD.. Associate Professor Department of Computer Science and Engineering	2.8 Experience and Qualification of Mentors	15 Years ME,PhD..
2.9 Contact Details of Mentors	8144328923	2.10 Current Development Status of innovation	Current Development Status of the Innovation The Hospital Bed Management and Emergency Management System is currently in the early stages of development, with essential foundational components actively being worked on. The overall project is in Progress
2.11 Expected time of completion of idea	1 year	2.12 Problem Statements	Frontier Technology in MSME
2.13 Idea Sector	Healthcare & Life sciences, Medical Devices, Pharmaceuticals, Biotech, AYUSH and any related sub-sector		

3. Financial requirements:

3.1 Total idea/project cost

Particular/Item (As per the scheme guidelines)	Amount GOI assistance (Rs. In lakh)	Incubatee share (Rs. In lakh)
Technology related Expenditure towards machine usage charges etc., Electricity charges, Procurement of raw material , testing/Calibration charges, other charges essential for development of idea Max (10.00) lakh.	10.000	0.000
Charges for mentor/handholding supporting team Max (3.00) lakh.	3.000	0.000
Travelling Expenses or any other item not covered as above may be allowed as per need for development of the idea Max (2.00) lakh.	2.000	0.000

Total idea/project cost (Rs in lakh):	Total GOI Assistance required (Rs in lakh):	Total Incubatee share (Rs in lakh):
15.000	15.000	0.000

Approved Activity-wise break

Approved By	Approved Date
PMAC	01/07/2025

Particular/Item (As per the scheme guidelines)	Amount GOI assistance (Rs. In lakh)	Incubatee share (Rs. In lakh)

Charges for mentor/handholding supporting team Max (3.00) lakh.	3.000	0.000
Travelling Expenses or any other item not covered as above may be allowed as per need for development of the idea Max (2.00) lakh.	2.000	0.000

Total idea/project cost (Rs in lakh):	Total GOI Assistance required (Rs in lakh):	Total Incubatee share (Rs in lakh):
15.000	15.000	0.000

4. Other students/Entrepreneurs associated with this project/idea

Name		Aadhar No/Udhyog Aadhar No/Udyam Registration	
Monisha S		642640XXXXXX	
B S Ragav Krishna		575762XXXXXX	
Nethrabalan G		641559XXXXXX	
Ref. No.	INC24DTN065026	5. Summary of the idea. This is the section reviewers read to understand the technical solution. Please state the solution clearly. Reviewers may ask: What is the actual technical advancement or improvement provided by this solution?	Real-Time Bed Tracking: GPS-based tracking for nearby hospitals with available beds. Automated Emergency Handling: Essential patient info input with Aadhar validation for prioritized requests. Seamless Bed Booking: Users can reserve beds for non-emergencies, with immediate confirmation. Integrated Hospital Dashboard: Allows staff to manage requests and track bed occupancy efficiently. Real-Time Updates: Automatic updates on bed availability minimize errors and ensure accurate data. Solution Impact: Reduces response times, optimizes bed utilization, and enhances patient experience through scalable, data-driven management.
6 (a) Is it a new concept?		YES	
(b) Prior art on the concept, if any	No	7. Main Problem Being Addressed in the Project (Every solution targets a certain problem. Please use this section to highlight the specific problem the solution addresses. This section can be as short or as long as needed to describe the precise problem the solution addresses)	It serves two main user groups: patients and families seeking urgent medical care and hospital staff managing admissions. Patients benefit from quick access to available beds and real-time information, while hospital staff can optimize resource distribution and workflows. Key beneficiaries include individuals needing urgent care, emergency department staff, and non-emergency patients, all of whom experience improved efficiency
8. Background for getting the idea?			

a. Who is it for?	The Hospital Bed Management and Emergency Management System supports patients and families seeking urgent care by providing quick access to available beds, while hospital staff can efficiently manage admissions and resources. Key beneficiaries include emergency patients needing immediate support	b. What will it do?	The Hospital Bed Management System streamlines resource management with real-time bed availability, emergency requests, and seamless booking. It includes a staff dashboard and automatic updates, enhancing efficiency and patient access to care.
c. Any unique features? Explain?	The app offers real-time bed availability, prioritizes emergency requests, and verifies Aadhar numbers for secure admissions. Patients can input their conditions, and GPS directs ambulances to the nearest hospital. Hospital staff manage beds and requests, supported by data analytics.	9. How simple or complex will the idea's execution or implementation be? What are the risk factors involved in executing the idea?	The Hospital Bed Booking and Emergency Management System involves moderate complexity, with risks including data breaches, regulatory compliance, and potential system downtimes. Integration with existing systems and real-time data handling add to the challenges.
10. How soon could the idea be put into operation? (TRL of prototype)	TRL 6	11. How much investment would you need for prototyping of the Idea?	15000

12. (a) How do you intend to protect your idea (i.e. your intellectual property or IP)? Status of IPR (If any)	To protect the idea, I plan to file for a patent on the unique algorithms and processes involved.	(b) Related Background This section is used to highlight information that can be used by the reviewers or patent attorney to help put the solution in proper context. You can think of this section as something similar to the introduction section of an academic publication. This section is specifically reserved for other people's work (please include competitive work) as well as your past work that you believe will aid the reviewers in understanding the technical landscape. Data related to or supporting your solution should NOT be in this section, it should be in Section III: "How is this Solution Made and Used."	Digital healthcare solutions are essential for managing resources and emergencies. Current hospital booking systems often lack real-time updates, emergency prioritization, and secure identity verification. Past successful IT projects highlight the need for user-friendly and secure systems that improve patient outcomes. With evolving privacy regulations, there is a clear demand for a comprehensive platform that ensures real-time tracking, prioritizes urgent care, and safeguards patient privacy.
13. How is This Project Made and Used: Please describe in as much detail as possible how the innovation is implemented. This includes details on how you actually make, assemble, synthesize, or build the solution and details on how the solution is used once it is made. Reviewers will ask: How does the technical innovation actually work – or – what is the detailed process to achieve the technical innovation? Please help convince the reviewers with supporting statements using as much of the following that is available: your thoughts, logic, supporting literature, and/or experiments.	The front-end is built with React, ensuring a responsive UI for searching nearby hospitals, checking bed availability, and monitoring bookings. The back-end uses Node.js and Express.js to manage API requests, data flow, and hospital databases while ensuring compliance with privacy regulations like HIPAA. Users' GPS locates nearby hospitals for emergencies. In emergencies, users provide their Aadhar number for verification, and requests are dispatched to the nearest hospital.

PMAC	01/Jul/2025 03:38:59 PM	Approved By PMAC	The 9th PMAC held on 24/06/2025 has approved this idea for Gol grant. Please check your mail and do the needful as instructed on priority basis. This may be treated as most urgent. View/Download
------	----------------------------	---------------------	---

☒ I declare that:

1. I have read the entire scheme guidelines and shall abide by all the requirements stipulated therein for seeking financial assistance.
2. I hereby declare that information given above is true to the best of my Knowledge and that I have not withheld/distorted any material fact.
3. Any information/ documents that may be required to be verified shall be provided immediately before the concerned authority.
4. I hereby declare that I have not availed any financial assistance for this purpose from any other scheme from any Central/ State govt. agency.
5. In case the Idea is approved, Host Institute would undertake to make facilities available to carry out the development arrange for the submission of periodic progress reports and other information that may be required by the Ministry.
6. I certify that the accounts of the funds received and spent will be kept and made available on demand, as per scheme guidelines
7. I certify that the funds will be used only for Idea development as per activities defined in Scheme Guidelines & no funds out of this grant will be utilized for any other activity/production purposes.
